

**Solidarity card from the fourth Intergalactical encounters
on the ZAD of NDDL
to the peoples, organisations, collectives
who struggle against the capitalist hydra**

To our comrades who struggle at the bottom on the left on the five continents, for another world where many worlds exist,

We, signatory organisations,

From the ZAD de Notre-Dame-des-Landes, France,

As a result of the intergalactical encounters that occurred on August 2020, we are sending our **solidarity greeting to all the struggles which had been represented during these encounters**, as well as to those which reflect in it.

We reaffirm, as the central axis of our struggles, the character :

Anti-patriarchal,
Anti-capitalist,
Anti-colonialist,
Anti-imperialist,

In defence of the Earth, the Territory and With the Oppressed.

Justice for everybody !

In the same way, we reaffirm the will to keep on weaving solidarity and fighting links beyond borders, more than ever necessary to defend our home world and to be united against this destructive system.

So, with these greetings, we reiterate our solidarity with :

- The Palestinian people and anti-Zionist struggles,
- The struggle against a second airport in Jeju-do (South Korea)
- The Hong-Kong popular struggle,
- Kichwa struggles in Ecuador, Mapuche and Chilean peoples and with all other struggles in Abya Yala

- Zapatist and Abejas communities in Chiapas, as well as with other struggles for free determination in Mexico,
- The Berlin Latinoamerican Bloc and with migrant organisations, wherever they are based, that represent and fight for a world without borders,
- Self-managed canteens and everyone who feeds struggles and people rejected out the system,
- Every oppressed people as well as the ones repressed by police violence, as it has been carried by the members of « Justice et Vérité pour Babacar » collective,
- Ecological and decolonialist struggles in Martinique and in other so-called « overseas » territories, still colonised, exploited and oppressed by the French State,
- Self-determination struggles led by Basques, Bretons, Catalans and Corsicans,
- Struggles against mega-projects, mainly mining and logging, carried by Papuan people and other Indonesian peoples who defend their cultures and their identities,
- The Rojava autonomous experience and those who are building it,
- Struggles against the project to extend the port of Nantes-St Nazaire, Brittany, France,
- Struggles for liberation and respect for genders
- The popular democratic struggle in Algeria,
- The Yo Allah Suuren Panafrican movement which undergoes neo-colonial policies of the French State as well,
- Struggles of precarious and migrant workers in Spain, in France and in all other countries,
- And specially with all women and gender dissidents who are struggling.

We denounce this system which daily kills and divides, using borders, walls, polices, prisons, injustices and mercantilization of life and the earth.

We denounce and will keep on fighting against western and multinational companies that oppress us and further oppress our sisters and brothers in colonised territories again and again.

To that purpose, we know we must continue in looking for different ways of living and increasing resistance and disobedience to confront capitalist authoritarianism.

We deplore and recognise that this list is not exhaustive, **that we are many more**, engaged in building up a vessel Earth which will carry us to a galaxy providing shelter and food to each one of its inhabitants.

We acknowledge the ZAD de NDDL and its struggle which have permitted to organise and welcome these intergalactical encounters in the Ambazada.

We insist on the importance of multiplying these events in which we meet, we recognise each other, we exchange, we reflect, we improve and that strengthen us.

As long as they touch one of us, they touch all of us !

ZAD de NDDL, Friday the 28th of August 2020.
